Schedule of Meetings

1. Planning meetings for the 2026-2027 school year include:

9.8.2026	11.10.2026
1.12.2027	3.9.2027
5.11.2027	

Business Advisory Council Mission and Vision for the 2026-2027 School Year

Business advisory councils operate under [three quality practices](#): **Develop Professional Skills for Future Careers**, **Build Partnerships**, and **Coordinate Experiences**.

DEVELOP PROFESSIONAL SKILLS FOR FUTURE CAREERS

Describe how the business advisory council plans to **Develop Professional Skills for Future Careers** for the 2026-2027 school year.

Initiative 1

Describe, in detail, the plan associated with implementing this quality practice.

Build relationships with local businesses to promote work-based learning experiences for senior high school students is an initiative. A subcommittee has been formed to continue this work.

We are beginning to work with interested businesses regarding: Developing, creating, and completing a learning/training plan with the student and teacher; Communicating clear expectations for student behavior; and Providing ongoing updates and feedback to the student.

Student goals and objectives need to be understood. Work-based learning responsibilities need to be identified in the training plan. Confidentiality is important to be discussed and communicated clearly with students. Conduct rules and safety/emergency procedures are addressed and communicated clearly. Discuss any updates in responsibilities and management change. Feedback is provided regularly to the student involved in WBL.

These experiences help students develop professional skills for the future.

List all participating school districts. What percentage of students within the business advisory council will be impacted by this initiative?

Participating school districts include C-TEC, Granville, Heath, Johnstown-Monroe, Lakewood, Licking Heights, Licking Valley, Newark, Northridge, North Fork, Southwest Licking, Franklin Local, Tri-Valley, and Zanesville. We are in the beginning stages of providing this for our students. Roughly 4% of students were impacted by this initiative.

List all businesses and specify industries involved. What role does the business play in implementation?

Ariel, Manufacturing; Licking Memorial Health Systems-Health Sciences; Bane-Welker-Manufacturing; Samuel-Manufacturing; Hendrickson-Manufacturing. We are in the early stages of work-based learning and the businesses will partner with the high

schools for implementation.

Work-based learning provides hands-on, experiential learning within high demand occupations and that is the role that business plays in the implementation of these experiences.

The Newark Learning Center that connects Junior Achievement in our districts continues to grow. JA BizTown provided 2211 students in 37 learning experiences totaling 43,753 hours for students to get authentic learning during the school year. JA Finance Park had 528 students in 12 learning experiences totaling 9807 hours as well. These are hands-on experiences for students to apply content from the classroom to the learning center as a culminating field trip.

School Partnerships and Career Pathways programs continue to provide career awareness and experiences for our students.

How does this initiative help support or teach relevant, in-demand technical and professional skills for students and educators?

Students are experiencing relevant skills by being involved in the workforce situation. Students are connecting curriculum to real world situations within the company environment. Being on time, staying focused, and following directions are a few of the skills students learn. Educators who evaluate the students based on the learning plan are also supporting these skills with continued discussions and assignments.

Business mentors help support these professional skills needed when they are with students in the work environment, guest presentations in the classroom, and when educators participate in the Educator Boot Camps.

What skills gap or talent pipeline challenge does this initiative address to help your area/region? What data supports the identified skill gap or pipeline challenge?

Students and educators are becoming more aware of the manufacturing careers available with our county. With students experiencing work within the manufacturing areas, our students have more relevant awareness compared to only touring or watching a video of the work environment.

How does this initiative impact students with disabilities?

Students with disabilities are involved at the level appropriate to their talents. All students need to experience work-based learning and our companies involved provide that experience.

Initiative 2

Describe in detail the plan associated with implementing this quality practice.

Project Search Program

This program serves 5th year seniors with disabilities (interns), providing them hands-on work experiences across three or four rotations in various Licking Memorial Health Systems (LMHS) departments. This is the 11th year for this program that helps develop professional skills for future careers. Over the past 10 years, 73% of the interns have been hired by LMHS. Each year, new departments are being included in the rotations.

List all participating school districts. What percentage of students within the business advisory council will be impacted by this initiative?

Participating school districts include C-TEC, Granville, Heath, Johnstown-Monroe, Lakewood, Licking Heights, Licking Valley, Newark, Northridge, North Fork, and Southwest Licking.

Typically, there are 9 or 10 students involved each year. Approximately 100 students have been involved these last ten years.

List all businesses and specify industries involved. What role does the business play in implementation?

Licking Memorial Health Systems is involved in this initiative and have staff that coordinate the experiences and rotations for students involved.

How does this initiative help develop relevant, in-demand skills for students and educators?

By exposing Interns to this program, Interns are networking with employees of various degrees and training. Interns are doing tasks in the difference departments, involved in meetings, policy and procedures exposure, new hire orientation, and other experiences to highlight relevant skills needed for in-demand careers

What skills gap or talent pipeline challenge does this initiative address to help your area/region? What data supports the identified skill gap or pipeline challenge?

Skills gap or talent pipeline challenges for students with disabilities is supported by this program. All work is honorable work and students with disabilities are motivated and encouraged to enter the workforce after participating in this program. Examples of work would be food preparation, custodial, horticulture, administrative support, hospitality, and clinical rooms cleaning.

How does this initiative impact students with disabilities?

This initiative is solely for 5th year high school students with disabilities. The Braedon Pollman Memorial Scholarship is being developed in collaboration with the Licking County Foundation and Braedon's family to award one project prepare graduation with a scholarship to assist them in their transition to work.

Note: Please add space/rows as needed.

BUILD PARTNERSHIPS

Describe how the business advisory council plans to **Build Partnerships** for the 2026-2027 school year.

Initiative 1

Describe in detail how the business advisory council plans to strengthen and expand business and industry representation and partnerships. Describe how the council identifies new industry and business partners to address the talent pipeline business skills gap.

Initiative 1

How will the council draw feedback from business and industry to inform decision-making?

A business directory for educators was created by the Licking County Chamber of Commerce who is an active partner in the BCAC. At various Chamber meetings, companies are learning about the directory, the goals of the BCAC, and joining. This directory is an electronic directory so updating is simple and in real time. Partnerships businesses make with educational districts helps educators with employment awareness that in turn supports the talent pipeline by sharing those opportunities with students. Skills gaps and employment needs are feedback needed to make decisions

What is the business advisory council's plan to utilize feedback and guidance from business and industry partners to increase skills for students and educators?

Bi-Monthly BCAC meetings allow feedback from business and industry to help with decisions that drive the work of the BCAC. Sub committees are formed to address new goals and initiatives.

How will identified industry partners co-develop relevant in-demand skills for students and educators?

The many areas of the Directory include Career Path/Industry classroom presentations, Internships, Job Shadowing, Mentoring, Company Tours, Interviews Career Rep, Job/Career Fair, Mock Interviews, Panel Discussions, Pre Apprenticeship Opportunities, and Work-based Learning Projects embedded into curriculum.

By having this business directory, educators can connect with those who address the above areas that can be embedded into curriculum so that students become aware of InDemand careers and student experiences.

The members of this directory are members of the BCAC. Feedback at bi-monthly meetings help support skill development for students.

How will partners impact career readiness for students with disabilities?

BCAC members provide opportunities for students to experience the work environment and skills needed for the future. Marketable skills are reinforced when students are involved in work experiences. This helps reduce the unemployment gap.

Initiative 2

Describe in detail how the business advisory council plans to strengthen and expand business and industry representation.

The Chamber of Commerce is always promoting business involvement in the BCAC. The directory has helped expand the representation on the council. With current members, one goal is to have more involved in attending the meetings by providing speakers that have a relevant message to draw more involvement. Strengthening the experiences for students by reaching out to our members and getting more involved in work-based learning is a goal.

What is the business advisory council plan to utilize insights from business and industry to increase skills for students and educators?

The Educator Boot Camp was formed due to business and industry requesting more educators involved in understanding what goes on within these local companies. Selecting local companies that support InDemand careers is our focus. Careers within Distribution, Logistics, and Advanced Manufacturing were highlighted in the summer boot camp. Attendees toured and did hands-on activities at Star Wipers, Covestro, Performance Training Solutions, and Performance Training Solutions.

How will identified expanded industries develop relevant in-demand skills for students and educators?

Our goal is to continue to develop and implement additional boot camps that will allow educators to learn about expectations of our local businesses for students entering our workforce. When educators have better understanding of such expectations they are better able to guide students properly into the various career pathways.

How will partners impact career readiness for students with disabilities?

BCAC members provide opportunities for educators to experience the work environment and skills needed for the future. These Marketable skills are reinforced when educators are involved in work experiences. This helps reduce the unemployment gap for students with disabilities.

Note: Please add space/rows as needed.

COORDINATE EXPERIENCES

Describe how the business advisory council plans to **Coordinate Experiences** for the 2026-2027 school year.

Initiative 1

Describe in detail how the business advisory council plans to increase [Work-Based Learning](#) for students.

The BCAC meetings have begun highlighting companies that support Work-Based Learning programs and how other companies can replicate to support students becoming involved in these hours on the job. Speakers at meetings share resources and tips to encourage other companies to get involved. High schools involved in work-based learning are share strategies and paperwork with others in leadership. The BCAC will approve these plans at meetings.

List all school districts and number of students that will benefit from this initiative.

C-TEC	16.60%
Granville	2%
Heath	1.90%
Johnstown	0.80%
Lakewood	2.20%
Licking Heights	0.60%
Licking Valley	8%
Newark	2.80%
North Fork	8.50%
Northridge	6.70%
Southwest Licking	1.50%
Philo	0.80%
Tri-Valley	0.60%
Zanesville	1.20%

List all businesses and industries that will be involved.

Ariel, Manufacturing; Licking Memorial Health Systems-Health Sciences; Bane-Welker-Manufacturing; Samuel-Manufacturing; Hendrickson-Manufacturing. We are in the early stages of work-based learning and the businesses will partner with the high schools for implementation.

What role does business play in planning and implementation?

The role of businesses is crucial in planning and implementing Work-based learning by providing real workplace experiences, mentoring students, and aligning with the student's goals. They collaborate with our high schools to ensure students are getting these opportunities. The benefits to our businesses are students gain practical skills, a stronger group of skilled talents is created, and a more competitive economy by fostering a skilled workforce.

Initiative 2

Describe in detail how the business advisory council plans to increase [Work-Based Learning](#) for students.

A subcommittee to prepare high schools to embrace work-based learning is being formed. Principals involved with work-based learning will mentor those just embracing these student experiences.

List all school districts that will benefit from this initiative.

Participating school districts include C-TEC, Granville, Heath, Johnstown-Monroe, Lakewood, Licking Heights, Licking Valley, Newark, Northridge, North Fork, and Southwest Licking Franklin Local, Tri-Valley, and Zanesville,

List all businesses and industries that will be involved.

We will use Licking Memorial Health Systems, Ariel, and Samuel as models within our county to provide information to the high school leadership in promoting the increase of work-based learning experiences for students.

What role does business play in implementation?

The role of businesses is crucial in planning and implementing Work-based learning by providing real workplace experiences, mentoring students, and aligning with the student's goals. They collaborate with our high schools to ensure students are getting these opportunities. The benefits to our businesses are students gain practical skills, a stronger group of skilled talents is created, and a more competitive economy by fostering a skilled workforce. By sharing examples of students involved with our high school leadership, this will motivate more involvement.
